It is a set of tabs that contains: Watch: Users can view the drawings for the selected project. Edit: Users can edit the selected drawings. Print: Users can print the selected drawings. Tools: Users can choose the tools to use. Options: Users can change the options for the selected drawings. Annotate: Users can annotate the selected drawings. RootViewController let navigationController = UINavigationController(rootViewController: viewController) self.window = UIWindow(frame: UIScreen.main.bounds) self.window.rootViewController = navigationController self.window?.makeKeyAndVisible() Is this the default AppDelegate code in Xcode 7.3, and if so, what am I missing? If it's a good practice to use this approach, how can I go about it differently, or is the official way fine. A: The default approach is the same as yours.
