What's New in the FTP Shortcut?

FTP Shortcut is a small stand alone utility which can be used to make FTP shortcuts easier to create and modify, using the standard windows command to open FTP sites in normal explorer windows. Passwords are always hidden and files containing them encrypted, making it a little more secure. Ideal for those wanting to use their normal browser to access FTP sites. This is a small, stand-alone executable file which utilises the features of windows to access FTP sites. Although using a special third-party FTP client may have many extra features, it is still possible to access FTP sites without one. Just like a URL for a webpage (ftp is accessed in a similar format: ftp://username:password@ftpsite.com) FTP Shortcut helps you to easily create FTP Shortcuts (like opening websites in normal explorer windows). You can choose your second FTP site password (which is stored encrypted in your user profile) and set shortcuts for each FTP site you want to access. It supports Windows XP and Windows 7. Support for Windows Vista is added now.
