By choosing combinations, the player will be able to create his own. I Am Bread is a game that you can play in your browser in the games page on our website. It is the perfect game for everyone and a great way of practicing mixing. We are constantly improving the game and adding new items to make it more interesting and fun for all of our users. Features: \* An easy to use interface with a cheerful and friendly look \* New items can be added to expand the gameplay \* Level editor that allows users to create their own levels and share them \* All of the assets are free to be used in a commercial or non-commercial project \* The game supports many file types including.obj,.fbx,.raw and moreQ: What is the best way to capture/save Ajax form values? I've recently changed a website which is being developed in PHP to use Ajax. One thing I can't seem to figure out is what the best method is to handle form values being posted from one PHP page to another, I've thought about using `$_SESSION` but I haven't tried it yet and I'm not 100% sure it will work for the form values I want to capture. I basically have 3 forms on my website and want to capture the input values of each form when submitted. The PHP code I have so far is: Hopefully someone can help me find a solution :) A: For user input, a common approach is to use hidden form elements. For example:
