I am trying to setup a network gateway with a GUI to be displayed on my Windows 7 PC. So on my remote PC I have put a gui application and on my local PC a network gateway. The problem is that when I start the gateway I can connect my PC via SSH to it and control the gateway gui but my PC can't connect to the gateway over the network. My SSH connection works fine. I think it's a firewall issue but I'm not really sure. I have many types of devices on the network and I think the local PC's firewalls might be blocking my connection but then again it doesn't seem to be the case. I have tried many things but no solution so far. If you have any idea on how to solve this problem, please answer and let me know how to do it. Thanks in advance for your help. A: Try 1cb139a0ed
