Begin the work on creating the new keygen. In the newly opened Autocad file, select All Menus > About Autodesk > Activation > Activate product. Select the file to be updated: in my case it was autocad.lnk, then select OK and click on the Update button. After activating your product you can start working on creating a keygen with your product. If you don't have Autodesk and don't want to spend money to buy it. In windows XP you can download it at [www.autodesk.com/downloads](http://www.autodesk.com/downloads). It's easy to use once you download it. The first time you open it, it will ask you to register. It's easy to do and give you a key. Save your key as a text file and store it on your computer somewhere. You can use an online tool to generate a key file, produces very good key files. All this free keys will be good only once. After the key generation you can use the downloaded key and activate it as described above. Note that when you register you need a code, for each product you will need a different code. The code can be found in the registration website. All the registrations codes for Autodesk products are listed in the following link If you are going to register an older version of autocad, you will need a lot of combinations and codes. Click to expand... I did that and it's worked fine, just remember to update to the latest version when it comes out. I have a client who uses the free trial version. Once it is expired, he has to pay for another copy. Click to expand... I have one for Autocad 2010, and one for AutoCAD LT. I think the LT one is the right one. The exact opposite is true. I have an old version of Autocad and an old version of AutoCAD. Both keygens are to the lite versions. I don't know why they did it like that, it's the same software. The free trial has its limitations. It's only good for a few days. I'm not sure how many hours, it was actually about two hours
