Heating up a pizza in a microwave oven might seem the most obvious thing in the world. What's the best way to cook a Pizza in the Microwave Oven? 1. Place the microwave. Xylitol and sorbitol are widely used as sweeteners, because they have the sweetness and other properties equivalent to those of sucrose. In recent years, however, diseases such as dental caries have been reported in association with sucrose, since xylitol is not assimilated. It was therefore proposed to use xylitol and sorbitol as sweeteners, by replacing sucrose which is widely used at present, in food and drink. For example, Japanese Patent Application Laid-Open No. 89470/1978 discloses that a diet which does not cause dental caries and is rich in nutritive value can be produced by the step of producing an ultra-low calorie diet, comprising the steps of heating a compound or compound mixture having a carbohydrate content of about 30-80% to a temperature of about 180.degree.-200.degree. C. in an inert gas atmosphere, to obtain a low calorie sugar syrup or the like, and adding the syrup to skim milk or skimmed milk powder or the like to produce the diet. According to this method, the production of a diet containing a specific calorie content can be achieved by giving a specified quantity of skim milk or skimmed milk powder to be mixed with the syrup. The diet prepared by this method is intended to be sufficiently effective for improving dental caries by replacing sucrose in milk, milk product, milk-containing materials or the like. However, the diet prepared by this method has, as compared with sucrose, a lower calorie content and a lower nutritive value (particularly lower protein content), and also a lower palatability. Japanese Patent Application Laid-Open No. 6070/1982 discloses that a mixture of crystalline carbohydrates having a solubility in water at 20.degree. C. of not less than about 60% and having a solubility in water at 100.degree. C. of at most about 4% is used for producing a diet of low calories and a diet of low calories and high nutritive value. According to this method, a diet of low
