Supersonic Wall A Supersonic Wall is a long combination of vertical lattice walls joined by horizontal lattice walls. A canopy placed over this can be seen in many of the early 20th century architecture studios of the Czech and Slovak architecture groups. The Supersonic Wall works as a superposition of constructive principles, combining the known strength of both of these types of construction. The idea is that a wooden box is provided in the middle of the roof's support and then one wall is made above that wall. The second wall is then made on the sides of the box wall and below the roof's top layer of wall.

See also The industrial style is also known as Blackwall style. References External links

Category:Roofs Category:Structural system Big Bad Bugs (1975) Big Bad Bugs is a 1975 science fiction B movie directed by Peter Jacobs and starring Arlene Dahl, Gene Nelson, and a child actor, Terry Dunn, as "the Bugmaster". The film is notable for its appearance of a giant hush bug (in the form of a three-foot (91-centimeter) tall animatronic), which has no known modern counterpart. It was re-released theatrically in the US in 1980 as Maniac Doctor. Plot A group of scientists are performing their own sort of space travel on a cylinder (about the size of a medicine bottle) called a Bug. They are collecting bugs for a variety of reasons. When the cylinder is not collecting specimens, it is shielding the scientists from radiation. The scientists come across a corpse on the surface of the Bug and bring it back to the cylinder, where they operate on it. One scientist becomes disoriented and begins hallucinating. He believes he is on another planet, where the Bug is called the "bug ship."

His personality is merged with a giant hush bug and he begins to call himself the c6a93da74d
