Hello, registered users, can I get the ability to have a search function on the forums? This will really save me time, as I'm sure I'm not the only person who can't remember what thread it was that I wanted to view. I was also wondering what all the icons on the sub forums mean? For example on the Galaxy forum, if I click that link, my avatar disappears, and so do the icons in the sub forum. If someone could tell me what it means/does, I'd appreciate it. Thanks. I have been a SM member for months. I would like to thank the admin for all of the effort he has put into this site and the graphics he has created! I also want to thank all of the members who have posted! Without your input the site would not be as good as it is today.Euryale (plant) Euryale is a genus of flowering plants in the family Melastomataceae. They are commonly known as tropical oxlips and are evergreen, hairy, deciduous orchid-like plants. They have large tubular flowers, with a long pachybasium in the mid-petal band. The flowers usually have three narrow lips, and are often fragrant. Euryale is a handsome showy genus, typically having large, single flowers with wavy margins, which open in late afternoon to attract pollinating insects. They grow in rainforests and other tropical areas. The plant is a key component of the urban landscape in the Tandjilinde forest of southeastern Madagascar. Species c6a93da74d
