Other tools include the ability to compare graphs between two charts or to generate a Kashi (description of planets in houses) for a chart. The program also provides much-needed data about each planet's location at the time of birth, including the sign, house, sub-order, aspect, and whether it is rising or setting. Many calculators are available, but they seem to be for generating date, month, or year predictions rather than detailed details of the kundli (which may be the case with the calculator offered on the company's Web site, where the user can define whether the birth chart is for herself, her mother, her father, or her son). e kundli 2009 has a very simple design and is easy to use. It is also filled with a lot of information. Information such as natal horoscope, my farsi horoscope, natal chart, authentic iqraa and authentic montazesh, can be found on the program. We have also added mitzvah and astrology lesson for each full moon according to most of the Jews, Muslim, and Christians. Every day a free horoscope is provided by us for all of the people through their e-mails. Astra Alkem software was having some compatibility issues with windows 7, so finally i did a fresh install of windows xp in VM and then run the software in it. It was smooth and working fine and i have tried doing kundlis in windows 7 and it was working fine. Note: kundli 2002 has compatibility issue with all windows OSs higher XP. It will not work with Windows 7,vista or 8/8.1 I am using same software and done much research on the same problem. The solution that worked for was to install XP as VM and then install kundli on the VM. I have installed kundli software same way first in windows 7 and recently on windows 8.1 tablet. Alternatively you can use kundli 2009 which is a better program and works on Windows 7.
