March 5, 2012 - 7.0 GEOSOFT OASIS MONTAJ ALLTEM DATA ... screen in the order of the given numbers, which is also the order in which the program follows. In this example, the number 1 is used as the index; number 2 is the index in this case. The program, as defined in this sequence, sequentially iterates over all index numbers corresponding to certain data numbers as input. If the data numbers in this example are the same, then the program will eventually iterate through all the indexes in the sequence until it encounters an index that does not match any index in the sequence.
