Braintree and would like to know if it's a payment processor or not. I'm asking because it allows for PayPal integration, which is a payment processor I know, but whether or not Braintree uses PayPal or not? A: It's a payment processing service that does the processing for you. It's not the same as a payment processor (like PayPal). No PayPal information is sent to Braintree. They are independent of each other. Braintree does its thing, and they also make it clear when you're using PayPal. In addition, the service is free and the \$X.25-10/month paid version is for over \$20K/month in volume. Tooltips - jQuery EasyUI Demo Tooltips Use the tooltip to provide short comments or instructions on each item.
