The devs must have definitely put a lot of work into making Silent Hunter V: Battle of the Atlantic one of the best looking games on the DS, even if it is a console from about 5 years ago. One of the reasons Silent Hunter V: Battle of the Atlantic is one of the most impressive games for the DS is that it is very detailed. You won't find many games that look this good. The entire thing is done in a stylistic way. For instance, the sub has many mechanical elements that you actually see in a submarine, and these mechanical elements are very detailed. They are not just a simple, geometric object like in most games. Silent Hunter V: Battle of the Atlantic looks like a real life video game, and more importantly it is as dynamic as it looks. It's like you are playing in real life. A lot of details have been used to give you the impression that you are in a life-size submarine, and not just a 6" screen.
