## Refx Nexus 2 Apres-ski Expansion Pack

After several years of development, Manuel Schleis and his team at ReFXNexus have finally released their first in a series of free expansion packs for ReFX Nexus. The Nexus 1 was the first sidechain effect of its kind to offer full control of the sidechain mix that could be done live or in real time. The Vowel & Diction effect gives you the ability to let your voice ring out strong, or fade out, or go soft, or distort and compress vowels or sound like you really used your voice, all this in a single, easy to use effects chain! This expansion pack contains all the sounds and effects that have been included in the Nexus ReFX NEXUS 1: 60 rough & dirty sidechain effects in a single user friendly ReFX Nexus effect processor. The main goal of the reFX Nexus 2 was to create a new expansion pack in the form of a rompler, while preserving the important features of the first version. There will be no interface changes, so you will not lose any features. Instead, reFX Nexus 2 has a completely new layout of controls which are placed in the second column. It makes navigation much easier and is suitable for all levels of experience. You can also set tags, bookmark presets, scroll through list of presets, etc. Other important additions of reFX Nexus 2 include 128 GB of presets, a completely new library, optimized presets, a new arpeggiator with an increased length of the pattern and a sequencer. If you are currently using the first version of reFX Nexus, all important settings and tags will be transferred to the new version. The reFX Nexus 2 is a rompler with 128 GB of samples. It has a new layout of controls and other new additions. A new arpeggiator has an increased length of the pattern and a sequencer. In addition, the reFX Nexus 2 contains 128 GB of its own samples. In order to use this sample library, simply install "Nexus 2.0".
