A new window management has been added, allowing structures and parts of structures to be arranged to any desired size, and still have access to all Tekla functionality, such as annotations, cross-sections, and parts. Also, Tekla Structures now provides the ability to open and close open windows on a project-by-project basis. Tekla Structures now provides an easy way to maximize windows by stacking them onto each other. This makes it easy to review related Tekla projects as part of a single interface, while the windows expand or shrink dynamically. In addition, an intelligent tooltips helps to quickly recognize the types and properties of parts and structures. Production It would be a good idea to make use of a 32bit version of tekla Structures if youre running an outdated model or a 32bit operating system. To save you having to perform a rebuild of all models, the design

client kit (DCS) project family now produces operating environments for the traditional models. New DCS project families include: Tekla Design Studio 2017; Tekla Design Studio 2019; Tekla Resource Center; Tekla Resource Center 2019; TEKLA Academy; TEKLA Academy 2019; Tekla Webinars 2019; Tekla Studio 2019; and Tekla Technical Project Support. New features for this version incorporate changes to the structural beam design workflow, as well as enhancements to Tekla Attribute Manager. This version also contains some enhancements for Tekla Attribute Manager. Tekla Attribute Manager is a powerful geometry development tool that provides engineers with a common means to create geometry characteristics. Until now, these characteristics were managed as attributes that must be physically defined in Tekla Structures. In this version, you can apply or remove attributes based on a group, attribute name, or other attributes. Furthermore, you can define the date when to apply an attribute to a geometrical element and to remove it from a different point in time. This capability allows you to change your element's geometry based on the historic data. 5ec8ef588b
