Who Mislaid My Wife, is an Italian drama film directed by Ugo Tognazzi. United States Attempts to Provide Relief Andrew J. Bacevich October 08, 2009 WorldNetDaily Politicians on the left and the right are wringing their hands over a humanitarian crisis in Somalia. The Right is calling on Washington to do more. The Left decries a humanitarian crisis that is being

contrived and exaggerated to allow the Obama administration to acquire more money to spend on expensive new programs. There is little doubt that problems in Somalia are significant. And since the United States is not the African nation in question, it is entirely appropriate that American interest and involvement be muted.

Nevertheless, criticisms of the Obama administration for failing to act quickly and fully in Somalia are misplaced. Isolationism was a common theme among liberals in the years following World War II. The idea that in a global economic system the United States should eschew foreign commitments

seemed to make economic and national security sense. The experiences of the early 1990s have shown that the same arguments made against U.S. involvement in Somalia are in fact the argument for U.S. involvement. The very same government agencies and media outlets that decried U.S. involvement in Somalia during those years repeatedly advocate U.S. engagement in Somalia today. But with that being said, the Obama administration is not the Bush administration, nor is the international system, which in both, quite literally, we can say, failed. The proximate cause of the Somalia chaos is a decades-old civil

war. U.S. efforts to prevent the conflict from breaking out into a wider war failed and created the conditions for the current situation. U.S. efforts began in 1982 when the international community, including the United States, intervened and organized a peacekeeping force, made up of African troops. The actual peacekeepers came from Uganda, not the United States. The Ugandan troops soon became pawns in the larger civil war, whereby various factions of the warring parties were employing the Ugandan forces to divide and conquer both each other and the peacekeeping force. The campaign to stop the Uganda peacekeepers

from being used as instruments of war merely compounded the U.S. failure in Somalia. The failure was not, or not only, one of U.S. policy.

Rather, the international community had failed to establish conditions in which the two warring parties in Somalia would not use the Uganda forces. In part as a result of the absence of U.S. involvement, the conflict continued. It lasted nearly two decades. The conflict brought the nation of Somalia to its knees. When it finally subsided, the main warring factions saw no need to go to the negotiating table, since victory meant securing resources for survival without constant infighting.

Since the breakup of the Somali government, the United States has provided some humanitarian relief. But neither the Bush administration nor the Obama administration approached that relief effort as a comprehensive, nation-building operation. This is not to say that any U.S. efforts to create a stable Somalia have been successful, nor that U.S. involvement in Somalia is responsible for the status quo. The Bush administration shouldered some of the blame for the failures of its efforts in Somalia. 5ec8ef588b
