KEYMACRO is a handy software utility for repeating keyboard macros for Windows. Keyboard macros are usually used for repetitive keyboard tasks. They can be stored in one of three ways. They can be recorded directly in a multimedia file or text document. Then, they can be played back through a multimedia file or text document. If there are several keys that do the same function, for example a "Press Key 1 to activate menu A" and a "Press Key 2 to activate menu B", you can simply use the sequence of keyboard shortcuts to record one macro and save it. That's a great way to speed up your repetitive tasks. That's how KEYMACRO starts. You can record keyboard macros, too, and save them to a file. One of the nice features is that you can save the macros you've recorded on your computer to an external USB drive. You can easily modify the macros and the format of the macros you have recorded. You can record the macros, too, and save them directly to a media file. The macro can then be played back through a file, or it can be recorded directly to a file.
