Lock Cursor Tools Crack + Free X64 (April-2022)

Lock Cursor Tools Description: Lock Cursor Tools is a lightweight piece of software designed to help you lock the mouse cursor over the window of an application you are using or in a specific area on your desktop, regardless of how many monitors connected to your system. Allows you to select the area, app or window for locking the cursor The application does not come with an interface per se, but rather it can be accessed from the System Tray following a quick and uneventful installation. As you can determine from the available functions, the utility enables you to learn more about the multiple monitors connects as well as set shortcuts to lock and unlock or swap between the desktops. The main role of the program is to lock the cursor, an operation you can complete in just a few steps. Therefore, while freezing it over an app can be done with one click, if you prefer locking it over a certain area, then you can either enter the left, right, top and bottom space or hit the Set Area command to highlight it manually. A straightforward tool that can help increase your productivity Granted, the application can come in handy when playing various video games in windowed mode, as you do not need to look for your mouse when performing an action. At the same time, it can help avoid frustrating situations when you click and open apps or links you do not need at the time. Then again, since it allows you to focus solely on a program, it means that it can also be used for professional activities and perhaps, be more productive. Whether you want to freeze the cursor of your mouse for fun, leisure or to increase your productivity, you can consider giving Lock Cursor Tools a try. For our review of "Lock Cursor Tools" we have opted to test this app on a desktop with four (4) monitors connected (a total of eight (8) monitors). Each of these monitors are different size and configuration and have different resolutions. Features of "Lock Cursor Tools" As stated above, we have tested "Lock Cursor Tools" on a desktop with four (4) monitors connected. Each of these monitors are different size and configuration and have different resolutions. The "Lock Cursor Tools" software application comes with a "Lock Cursor" button which, when clicked, automatically locks the mouse cursor into place over the window of the application you are using. You will notice that a small bar appears on your desktop. When the mouse cursor is locked in place on
