A great text-to-speech (TTS) app that lets you read to yourself any text you want. Osmosis Cracked Accounts has two main features: - The ability to read text to you. - The ability to search on the default search engine. One of the main features of Osmosis is that you can download text files from the internet and read them to you from the device. These texts can be whatever you like (text files, blogs, emails, web pages or even...). What else can you do with Osmosis? \* Search on the default web search engine. \* Access the Internet using

the embedded browser. \* Send emails to anyone of your contacts. \* Listen to music and podcasts from your device. \* Listen to audiobooks from your device. \* Send text messages to anyone of your contacts. \* Use the internal camera and display your pictures on the screen. \* Play with games. \* Play with calculator, unit converter, date and time conversion. \* Read to you in 14 languages. \* Configure the appearance of the text. \* Control the reading speed and volume levels. \* Adjust the text size. What do you need to use Osmosis? \* Your device should be able to access the internet. \* There are two ways to

use Osmosis: using the local server and using an online server. \* If you have a local server, the application will upload to it any text you send to it. If not, you can use the online server. \* We recommend using the online server, since it is much faster. \* In order to use the online server, your device should have an active internet connection and Osmosis installed. \* You will need a paid account to use the online server. \* Download the application and press 'Start Osmosis'. After you press 'Start Osmosis', the app will be online and listening for text. Press 'Add Text' to send the text you want to be read. In order to

browse the local server, press 'Add Text'. To send your text to the online server, press 'Options'. Here you will see your options: You can select to send your text to: - An online server. - A local server. - A mail server. - A web server. Select the online server if you want to use the server that we
