Full music hindi movie free download. Ghotale. Single-breasted suit jackets, button-up shirts and lightweight cotton. The Wo India Ka Shakespeare Telugu Full Hindi Movie 720p Free DownloadQ: scrolling with viewpager is able to scroll all pages, why? I want to hide the viewpager so it can be used only as a additional button. Now I have two TextView and add the Viewpager, the viewpager has some pages and I want to hide and show the TextView with swiping. Now the problem is that I can't just use the swipe to scroll the viewpager. I have to scroll all the pages to hide the viewpager. I mean to say if I swipe to hide the viewpager and I go to page 1 of viewpager and then scroll down to the 2nd page of viewpager, the 3rd page will be hidden, and I have to go page1 of viewpager and swipe to the 2nd page of viewpager to hide the viewpager and this goes on and on. It means I have to scroll the viewpager for each page just to hide the viewpager. Is there a way to hide the viewpager with simple swiping action for scrolling the viewpager to the next page only when I swipe the viewpager right or left? Thanks in advance. A: Instead of using swipe to hide the viewpager, how about Use ViewPager.setCurrentItem() to hide the Viewpager Use ViewPager.setCurrentItem() and ViewPager.onTouchEvent() to show it again when the user finish touching on the viewpager like this: @Override public boolean onTouchEvent(MotionEvent ev) { int action = ev.getAction(); switch (action) { case MotionEvent.ACTION_DOWN: { viewPager.setCurrentItem(viewPager.getCurrentItem() + 1); viewPager.onTouchEvent(); return true; 04aeff104c
