There's one important aspect of the Creative Cloud that is missing from Lightroom: YouTube. But that's now coming thanks to partnership with Google. The app's missing functionality can be appreciated from the experience of making full use of Photoshop – there's no need to export images to the photo sharing platform; instead you can make corrections, order paper prints, or upload images directly. Quality is very good, as these portability issues have never hampered Lightroom's quality before. The full-featured **Photoshop Elements** program has a focus on organizing photos and organizing them well. It gives you a number of different display options, letting you access your files in a simple, unobstrusive way. Elements allows you to organize, share, edit, and print your photos using an intuitive and easy-to-use interface. You use the same interface to select a photo, apply a variety of tools, and swap back and forth between the photo and a guide book. And yes, we're being careful saying it's the first time, because there's a chance that they'll do that again and surprise us. No, wait. For now we're going to go with the first time it's existed on iPad. We are not sure if the purchase button will only work on the latest Creative Cloud apps, or if it will work on all of them, but we're assuming it will only work on apps that you own the renewal rights for, leaving this application to people with Lightroom or Photoshop. Then every time it's available for use, the button will become disabled.
