I tried with a couple of tutorials and the library that you.com provided, and I can't find any tutorial that explains how to use it. Finally I just used the settings that.I didn't try to add many presets. Finally, here is what I did so far: Downloaded the plugin and unpacked it Opened the folder "Videohive" and opened the folder "textures" to get the texture packs I have an RGB texture pack (or any other kind) and I put it in the "Videohive" folder. Then, I put "textures/cat.t.rgb" (I had one of the cat-eyes texture) in the "textures" folder. I activated the texture pack in the videohive folder. Finally, I activated the text presets in the plugin
