PSOProxy (or PXSOProxy) is a script that makes it possible to download and play the Dreamcast version of Phantasy Star Online games such as Phantasy Star Online, Phantasy Star Online 2, Phantasy Star Online 2: Eternal, Phantasy Star Online 2: Endless Frontier, and Phantasy Star Online 2: Episode I. History: PSOProxy was originally created by a user called Neinheart. Neinheart would host the original

link to the emulator in an FTP server and would send requests to the web server (currently hosted on IRCNet) to get a snapshot. A few months later, the person behind Phantasy Star Online 2: Eternal would ask for the link, but the link was deleted (the person posting the link couldn't be reached). This person provided a better link, allowing the link to actually be used. Phantasy Star Online: Eternal version 1.2 was used. Usage: PSOProxy operates as a web server. Before entering a URL, you must enter the port number, which currently stands at 11093. If you do not enter a port number, the server will default to port 11093. are important in creating a political roadmap for Syria, the threats from ISIS in Iraq and Syria are too high to let ISIS have an uncontested safe-haven. ISIS has a strategy and they are implementing it. ISIS must be tracked and stopped before it expands and attacks the U.S. homeland. The combination of pressure on ISIS from both the Sunni tribal leaders in western Iraq and the tribes in Syria, along with the U.S. government forces using ground troops to cut off ISIS from the outside world, is having an effect on the ISIS leaders. They are losing soldiers, weapons, supplies, and revenues. ISIS leader Abu Bakr al-Baghdadi ordered the formation of a caliphate in June of 2014, and he is pressing forward with this mission. (See more about al-Baghdadi here). In the past week, ISIS has reportedly taken over a large segment of Iraq's territory from Baghdad as the Iraqi forces are unable to advance on ISIS. ISIS has also taken control of the Iraqi border town of Rutba from the Iraqi security forces. According to the U.S
