Cracking Adobe Photoshop is a bit more involved, but it can be done. First, you'll need to download a program called a keygen. This is a program that will generate a valid serial number for you, so that you can activate the full version of the software without having to pay for it. After the keygen is downloaded, run it and generate a valid serial number. Then, launch Adobe Photoshop and enter the serial number. You should now have a fully functional version of the software. Just remember, cracking software is illegal and punishable by law, so use it at your own risk.

This looks a lot like the original MacBook Pro 11-inch. Instead of fitting in the same Ultrabook class, it's fitting into a premium category. The 13-inch Apple MacBook Pro is \$999 and the 15-inch is \$1,299. Toss in the Apple Pencil and the price climbs to \$1,799. The 13-inch starts at \$1,699. The TouchBar acts more like a volume and brightness slider than a mix of function keys and the like. And that space above the keyboard is just wasted. The single row of function keys is cramped and limited, and the arrow keys are removed. But the TouchBar isn't an embarrassment to be hiding, it's a feature to be proud of. Lightroom 5 (for Mac or Windows) turns Photoshop on its head by including a palette of tools to edit and view photos—plus a big screen—and hiding the Photoshop tools in an Accessory view, nudging them out for iPad owners. The TouchBar dips into a number of Photoshop features that don't live in the app itself. For example, the app can export different versions of a single photo to each of those apps, but there's no way to get into that menu from the TouchBar. Adobe recently announced a new darkroom mode to Photoshop. If you've been looking for a way to work on your photos at night without disturbing your neighbors or risking a power outage, this might be a handy addition. There's a new fast Action feature in Photoshop 2023 that lets you create an Action for just about anything. (Of course, you could also navigate to the Actions panel in the Action Browser and go hunting for one for the specific task.) In my testing it seemed to be pretty smart in finding Action duplicate names and suggesting alternatives. The improvement is a great fit with the OCIO human insight automation feature as well.
