Of course, there are many different ways to achieve this, but generating a PDF makes it really easy and fast. The only drawback is that designs usually look better in print or at full-size. At smaller sizes and page layouts, you get the outline of different elements appearing where it shouldn't. How nice and smooth the design looks at 100% is also out of the question. You'll have to deal with things like the size of the margins or trimming of various elements, which can be time-consuming and tedious.
